

Native Barcode Generator for Crystal Reports

The object used in this report is the complete barcode generator; no other components need to be installed to generate barcode symbols. Simply copy the object from the details section below to the clipboard, paste into your report, and change the data source:
www.idautomation.com/barcode-components/crystal-reports-native/

Before production, IDAutomation suggests verifying the result with a Barcode Scanner:
www.idautomation.com/barcode-scanners/linear/usb-barcode-scanner.html

Notice: The barcode symbol below may appear distorted in print preview because of low screen resolution. It will appear accurate when printed.
